

WORK SMART, WORK SAFE WITH HEADLITE™

LIGHTING PRO TECHNOLOGY™

TOOLS...NOT TOYS™

IF YOUR JOB — AND MAYBE EVEN YOUR LIFE — DEPENDS ON THE QUALITY OF LIGHT YOU USE, THEN YOU NEED THE HANDS-FREE HEADLITE™ FROM LIGHTING PRO TECHNOLOGY.™

HEADLITE™ utilizes several innovative design features to produce high-quality, high-reliability illumination, every time:

- Voltage is regulated with a built-in micro processor which enables batteries to deliver a constant level of brightness, with no dimming until the very end.
- Voltage regulation provides longer useable light (burn time) of 10+ hours with standard 6 AA battery pack. 24 hours or more continuous illumination possible with optional battery pack.¹
- Voltage regulator permits a "soft start" to help prolong bulb life. (Most filament wear occurs when the light is turned on.)
- Variable-focus optical chamber reflector and halogen or xenon bulb combination produces a brighter, whiter (3100K, the equivalent of a 200-watt incandescent bulb), shadow-free beam for better visibility.
- User-selectable light levels help conserve battery power and allow you to balance your need for burn time. A pulse indicator provides advance warning when batteries start running low.
- A choice of bulbs (0.27 amp, 0.5 amp and 0.9 amp) allows you to further "balance" brightness levels and battery life. Brighter 0.9 amp bulbs use more power, resulting in shorter battery life. Longer battery life possible when using the 0.27 amp bulb.

Lamp extends, swivels and tilts for more accurate beam positioning.

Pros who know lighting choose HEADLITE

For over 25 years, U.S. Forest Service firefighters have been purchasing our HEADLITE to help light the way under the most extreme conditions.

U.S. Navy Damage Control Officers (DCOs) have also been selecting the HEADLITE for ship-board use — for over 15 years. Other demanding users include fire and EMS professionals; search and rescue teams; police, security and law enforcement agencies; utilities and public services

departments; manufacturing companies; maintenance and repair operations; and health and safety personnel.

Additional features:

- Waterproof lamp extends, swivels, tilts for accurate beam positioning.
- Lens is shatterproof and scratch resistant.
- Detachable lamp assembly for hand-held use.
- Spare bulb included in lamp assembly.
- Two fully adjustable straps available for either hard hat or soft cap mounting.
- Polarity protection: Design safety feature prevents light from working if batteries are installed incorrectly.
- Water/impact resistant battery pack.
- Customized clips to fit any helmet or hard hat.
- Rugged, durable professional-grade construction.
- A variety of bulb and interchangeable battery pack options are available.
- Uses alkaline or lithium AA or D batteries, depending on battery pack.

Optional long life battery pack provides up to 24 hours of continuous light. Waterproof battery pack also available.

Specifications:

Dimensions: * Lens diameter: 2.25"

Lens assembly: 2.75" × 3.25" × 2.5"

Standard battery pack: 3.75" × 3.25" × 1.00"

Rubber strap for hard hat: 24.25" × 1.75"

Weight: 13.5 oz. with fully loaded standard battery pack

Standard power source: 6 AA alkaline batteries

Power output: 9 volt with standard battery pack

12 volt packs are also available

Burn time: 10+ hours continuous, with standard battery pack¹

Bulb type options: xenon 4.5V, 0.27 amp

halogen 4.5V, 0.5 amp

halogen 4.5V, 0.9 amp

Get better, brighter, longer-lasting light

When you're relying on a light to do your job, insist on useable light... insist on a constant level of brightness. Lighting Pro Technology.™ Because seeing is believing.
