

THE ALWAYS READY, LONG-LIFE PALMALITE™

LIGHTING PRO TECHNOLOGY™

TOOLS...NOT TOYS™

PALMALITE™: THE ALWAYS READY, INCREDIBLY POWERFUL, LONG-LASTING FLASHLIGHT THAT FITS COMFORTABLY IN THE PALM OF YOUR HAND.

How often have you needed a flashlight, especially in an emergency, only to find that the batteries had died? Now you can avoid this problem with Lighting Pro Technology's amazing new PALMALITE.

Stow it and forget it — until you need it.

PALMALITE is a flashlight that will always be ready whenever you are. It's powered by two long-life 123A lithium batteries that will last up to 10 years in storage under normal conditions¹. PALMALITE is so compact (2" diameter x 4") and lightweight (5.9 ounces) it can be stored anywhere you may need a reliable emergency light:

- Car trunks and glove compartments
- Kitchen drawers
- Night stands and bureaus
- Closets and pantries
- Utility and furnace rooms
- Laundry rooms
- Basement workshops
- Toolboxes
- Storage sheds and lockers
- Garages and attics
- Boats, campers and trailers
- Motor homes
- Vacation cottages
- Dorm rooms
- Suitcases and briefcases
- Golf/sports equipment bags
- Tackle boxes
- Backpacks and carry-alls
- Belts and tool belts

The little light that packs a big punch.

The PALMALITE is small, yet powerful. It has a crystal-clear halogen bulb and custom-designed reflector

which provide a superior level of brightness and a shadow-free, focused beam. With more light output than a larger 2 D-cell battery flashlight, the PALMALITE emits a bright light that stays bright until the batteries wear out.

PALMALITE features a high-strength polymer housing with a shatter and scratch-resistant lens which allows it to withstand rough handling. Auxiliary red, green and blue lenses for special purpose applications are available (not included). PALMALITE is also waterproofed to "lifeboat" standards.

Additional features:

- No need to keep spare batteries. 123A lithium batteries have up to a 10-year shelf life, and will not lose power while in storage, or even after periodic use¹.
- Works in extreme temperature conditions, from -40°F to 155°F.
- Small and lightweight. Fatigue-free comfort in the palm of your hand.
- Large safety pin for attaching to belt, clothing or equipment.
- Intermittent switch setting for emergency signaling.
- Environmentally friendly: Lithium batteries do not contain lead, mercury, or cadmium. And, they won't leak or corrode.
- It arrives with batteries loaded, so your PALMALITE is ready to use.
- Distinctive safety-orange housing with yellow lens collar.

Specifications:

Dimensions: 2" diameter x 4"

Weight: 5.9 oz. with batteries

Power source: Two long-life 123A lithium batteries in special cartridge housing (batteries included)

Shelf life: Up to 10 years estimated even with periodic use¹

Run time: 3 – 3.5 hours continuous use¹

Bulb type: Halogen 5.2V, 0.5 amp halogen bulb to provide powerful, bright light output

Brightness: Over 3,000 foot-candles for two hours; 400 foot-candles after three hours

Housing: High-temperature polymer

Manufacturer-recommended replacement batteries and bulbs are available from Lighting Pro Technology.

PALMALITE shown with optional signal cone adapter.
